EXPERIENCE

Software Engineer

GoFive

- 01/2024 - Present Bangkok, Thailand
- Optimized CRM software performance, achieving a 15% improvement in system efficiency and reducing load times by 10%, resulting in a smoother user experience
 - Integrated advanced email systems with existing platforms, improving communication workflows and reducing email delivery delays by 12%
 - Redesigned and modernized user interfaces, enhancing usability and visual appeal, which led to a 20% increase in user satisfaction
 - Optimized memory usage for critical applications, reducing memory overhead by 30% and significantly improving application stability
 - Streamlined CRM processes, increasing user engagement by 18% and enhancing overall system reliability

Software Engineer

ThitsaWorks Company

- 06/2023 - 01/2024 Yangon, Myanmar
- Enhanced DFSP Portal with proactive maintenance and feature integration, boosting user engagement by 30% in Q1 post-launch
 - Optimized RESTful APIs for scalability, cutting response time by 20% and enabling future integrations
 - Designed user-friendly Finance Portal interfaces and Admin UI improving user-experience by 25%
 - Collaborated across teams to document processes and enhance transparency
 - Led cross-functional team to successfully launch Thitsa Wallet for secure transfers

Mid Frontend developer

Smilax Global company

- 06/2022 - 01/2023 Yangon, Myanmar
- Delivered pixel-perfect UI from Figma designs using React and Tailwind CSS, achieving 98% design accuracy and 45% faster load times
 - Built and optimized reusable React components, reducing bundle size by 50% and improving application performance
 - Developed Access Management Software with comprehensive documentation, leading to successful deployment across 3 enterprise clients
 - Integrated Google Maps API and QR tracking system, reducing manual monitoring by 40% and improving tracking accuracy
 - Implemented JWT authentication and security middleware, decreasing vulnerability risks by 15% and ensuring SOC 2 compliance

Web development internship

Lyrion Innovations

- 10/2021 - 01/2022 Yangon, Myanmar

EDUCATION

Diploma in Computing

NCC Education

- 2024 Uk

Diploma in Nautical Science

Myanmar Mercantile Marine College

- 2018 Myanmar
- (Extra First Class)

SUMMARY

Software Engineer (2020 - Current) Senior Frontend Developer with 4+ years of experience in FinTech and CRM solutions. Led development of Thitsa Wallet and DFSP Portal, achieving 30% user growth. Expert in React.js, Next.js, and TypeScript, with significant contributions to Mojaloop's open-source community. Proven track record of building scalable applications and RESTful APIs in Agile environments. Passionate about innovative financial technology and emerging web technologies.

KEY ACHIEVEMENTS

- Pixel-perfect UI delivery

Achieved 98% design accuracy and 45% faster load times.
- Enhanced DFSP portal

Increased user engagement by 30% in Q1 post-launch.
- Reusable react components

Reduced bundle size by 50% for improved performance.
- Interface modernization success

User satisfaction increased by 20% post-redesign.

COVER LETTER

Dear Hiring Manager,

With your company's innovative approach to leveraging React for seamless and efficient web applications, I am drawn to the opportunity to contribute as a Senior React Developer. Having followed the company's commitment to enhancing user experience through cutting-edge technology, I am inspired by the potential impact I could have in helping design and maintain high-performing, scalable applications.

During my tenure at Smilax Global Company, I took a lead role in delivering a pixel-perfect UI from Figma designs using React and Tailwind CSS. This project, where I achieved 98% design accuracy and 45% faster load times, underscores my proficiency in creating responsive and visually appealing interfaces while maintaining high performance. My experience in developing and optimizing reusable React components significantly reduced bundle size by 50%, driving substantial improvements in application speed and efficiency. Collaborating cross-functionally, I have honed my skills in converting complex UI/UX designs into technically feasible, robust applications—skills I am eager to bring to your team.

I am particularly enthused about the prospect of working with technologies such as Nx and TanStack within your tech stack, amplifying productivity in monorepo management and strengthening frontend-backend integration. This aligns perfectly with my passion and expertise in API integration, JavaScript, and performance optimization.

I look forward to discussing my approach to enhancing your React projects and exploring how I can contribute to your team's success. I would be happy to provide further insights into my work and explore how my skills can align with your company's objectives. Thank you for considering my application.

Sincerely,

Htet Aung Linn
